Remote Monitoring & Management Solutions

What is
ControloC

ControloC refers to our product line of intelligent devices that enable anytime, anywhere access to your remote assets. Remote assets need real-time intelligence and ControloC brings intelligence to yours.

The dictionary definition of an asset is that: 'Something valuable which an entity owns, benefits from and generating income due to its use'. So, your each asset is very important for your business and in today's online world, keeping them always on control is more more critical than ever.

You can keep control of your assets in a very easy way. ControloC refers to our product line of intelligent devices that enable anytime, anywhere access to your assets. Your assets, especially remote assets need real-time intelligence and ControloC brings it to yours. It allows you to control automatically without human intervention. With real-time monitoring, it detects possible risks beforehand, informs you immediately about extremes by e-mail/ SNMP alerting and moreover it can take actions automatically to manage the risks.

ControloC can impact on your business and give flexibility to be anywhere. It is now possible to link your remote assets or devices, gather real-time field intelligence that can be used to improve efficiency, reduce costs, and gain competitive advantage.

ControloC allows you to have "someone" looking after your assets.

ControloC allows real-time monitoring at anywhere in anytime and informs you immediately about extremes by e-mail/SNMP alerting. Although you are far from your assets, you can keep in touch with them and be informed what is going on there in real- time.

Why
ControloC

1 Security

ControloC allows you to have "someone" looking after your remote assets. It detects possible risks beforehand, informs the user and moreover it can take actions automatically to control the risks. It allows the risks to be managed automatically without human intervention.

Keep an eye on your assets and respond to issues without being physically in the field.

2 Real-Time

ControloC allows real-time monitoring at anywhere in anytime and informs you immediately about extremes by e-mail/SNMP alerting. Although you are far from your assets, you can keep in touch with them and be informed what is going on there in real- time.

No surprise makes success. Alarm notification to right person at right time is critical before failure.

3 Financial

ControloC reduces both risk and costs by doing smart monitoring, alerting and automatic remedial actions. When a failure happens on your assets, it affects on your entire business and the cost goes beyond replacement of damaged assets.

More profit due to less breakdowns and save with reducing unnecessary field visits.

4 Guardian

ControloC allows you to have "access control" to increase security. In addition to environmental monitoring, you can manage who and when open doors, control over users' access rights with time/ day restrictions and track all access attempts even successful or not.

Peace of mind just you are as gatekeeper. Restricting access to authorized staff only is very important to keep assets in secure.
